Find it EZ Software Corp. Releases New Version of its
Change Impact Analysis Tool, Find it EZ Code Search

Silicon Valley North — April 2, 2013 — Find it EZ Software Corp. today announced it will launch a new version of its application, **Find it EZ Code Search**, which works with **Microsoft SQL Server 2012 and Microsoft SQL Azure** to offer customers enhanced security, as well as innovative user interface features and reliability improvements. Find it EZ is the first fully integrated software search tool that empowers the development team with the ability to pinpoint the full impact of every software change request, across all components including the core program source, the underlying database and business intelligence report files such as Crystal Reports or SSRS. Interactive change lists produced are concise, accurate and thorough.

"Our ISV community is alive with innovation, and we're committed to helping our partners drive the next generation of software experiences," said Ross Brown, Vice President of ISV and Solutions Partners for the Worldwide Partner Group at Microsoft. "Adding compatibility for the latest Microsoft technologies helps ISVs to stay ahead of the competition and give their customers access to cutting-edge technologies."

"Find it EZ Software Corp. is excited to launch this new version of Find it EZ Code Search Professional," said Ken Gnazdowsky, President & CEO at Find it EZ Software Corp.. "Making our application compatible with Microsoft SQL Server 2012 and the latest cloud editions of Microsoft SQL Azure and Amazon RDS for SQL Server helps us offer our customers compelling benefits, including improved security and reliability features, tools to give them real-

time access to SQL code and data stored in local databases or on the Web, full support for multi-core processing and sophisticated, syntax aware search features to improve their estimating and software change management processes for their own applications built on Microsoft technologies."

Find it EZ Code Search **is certified Microsoft Platform Ready** to run on Windows 8/7/Vista/XP/2000 and Windows Server 2012/2008/2003/2000 32 or 64 bit editions. Find it EZ is a 32-bit C# client application requiring Microsoft .NET Framework 2.0. The software supports boolean, wildcard, and REGEX search engine syntax, and includes a plugin for Microsoft Visual Studio as well as support for syntax aware scanning of all Microsoft languages, databases and reporting tools.

"Ultimately, Find it EZ will save our customers hundreds of hours on change impact analysis, year after year, while pro-actively improving quality assurance during the software design and development phases with pinpoint accurate and complete change lists spanning the entire code stack."
